

towerclock.pdf – update June 18, 2009

Project: Recording at the UT west mall

Location: West Mall of The University of Texas at Austin

Date recorded: May 1, 2008

Microphone: Experimental

Recording Equipment: Focusrite Saffire Pro 26i/o interface, MacBook Pro, Logic Pro.

Download files: ambisonic b-format

Calibration and equalization:

Experimental microphone b-format outputs are provided without equalization.

Suggested equalization: none

Comments: I took my recording rig (completely portable, operating from the computer batteries) to the West Mall of the University of Texas at Austin, a busy place full of students, including those seeking donations for some cause. The tower clock (about 80 vertical from the mall) strikes noon; a good z-axis test.

Length: 07:35

Thank you for your interest in this project. Comments are welcome. Please feel free to look around the ACTLab website.
