

Fall 2009 course: RTF331R/RTF390N

SOUNDSCAPES

Make stuff. Take risks. Be awesome.

Create active space, sonic environments which change in response to human presence and evoke emotional response. Use computers, sensors, and objects you make. Learn to think in 3-D.

We're a bunch of artists, scholars, teachers, techies, and hackers building a new transdisciplinary approach to education based on interactive, collaborative, student-centered learning.
