DEPARTMENT OF HOMELAND SECURITY

Overview

This is the Department of Homeland Security's Performance Budget. It demonstrates the performance levels associated with the FY 2007 President's Budget and implementation of the first year of the Department's Future Years Homeland Security Program, FY 2007 to FY 2011.

This performance budget is submitted in compliance with the Government Performance and Results Act of 1993 ("GPRA" or the "Results Act") requirements for an Annual Performance Plan following Office of Management and Budget (OMB) guidance. The performance goals and measures targets contained in this Overview are those for subsequent reporting in the Department's Annual Performance and Accountability Report for FY 2006.

The overview begins by stating what DHS intends to accomplish to fulfill its mission and achieve its goals and objectives for the level of funding requested, thus accomplishing its

i i

The mission of the Department of Homeland Security is:

We will lead the unified national effort to secure America. We will prevent and deter terrorist attacks and protect against and respond to threats and hazards to the nation. We will ensure safe and secure borders, welcome lawful immigrants and visitors, and promote the free-flow of commerce.

What DHS intends to accomplish in FY 2007 by strategic goal including:

- **The Programs, which are the means and strategies to achieve goals**
- **Program Performance Goals and Measures,**
- **Resource budgets, both dollars and staffing levels by program,**
- **Past performance accomplishments in meeting targets.**

The following tables show the contribution of DHS programs to achieve the DHS strategic goals as demonstrated by program performance goals, measures and targets. Programs are the means and strategies to accomplish the strategic plan. For each program the staff levels and budget including component allocated overhead are shown to achieve the performance goals. Program tables are arrayed under the DHS strategic goal they most strongly support, although may support multiple DHS goals and objectives. Each program table shows all the DHS strategic objectives it supports.

This document has purposely been kept brief, in the belief that too much information can overwhelm rather than inform. Yet, by providing key information on programs it provides a comprehensive understanding of DHS is plans. For further details, additional information is available from three primary sources:

- The body of the DHS Congressional Justification for the President Budget, which includes detailed information by DHS's components,
- Supplemental information to this Overview is available at www.dhs.gov.
 - Appendix A on verification and validation of measured values,
 - Appendix B on changes in goals and performance measures based on the achievement of goals in FY 2005.
- Classified supplements available as appropriate.

Verification and Validation of Measured Performance Values

For each performance measure presented in this Performance Budget Overview a description of the means used to verify and validate reported measured values is reported in Appendix A which is posted on the DHS web site at www.dhs.gov under ‘Organization – Budget’.

The appendix includes for each measure the source of the data, how it is collected, and an assessment of the reliability of data. Reliability is classified either as:

- **Reliable** – the standard for reliability is determined by Office of Management and Budget guidance, OMB Circular A-11, Section 230 (f). At minimum, performance data are considered reliable if agency managers and decision makers use the data on an ongoing basis in the normal course of their duties. Performance data are considered reliable if transactions and other data that support reported performance measures are properly recorded, processed, and summarized to permit the preparation of performance information in accordance with criteria stated by management. Performance data need not be perfect to be reliable, particularly if the cost and effort to secure the best performance data possible will exceed the value of any data so obtained.
- **Inadequate** – the data does not meet the standard for reliable. In this instance, an explanation of plans to make the information reliable is included.
- **T. B. D. New Measure** – a new measure for which reliability will be determined.

Future year targeted levels of performance reflect the informed business judgment of program managers. Historical information informs these estimates. In a limited number of instances where historical information is not available targets are identified as estimates.
