**Subject:** Does it terrify you?

---

**Surveys show that people fear **public speaking** more than **death**!**  
**Do yourself or someone you love a favor and end that fear forever.**

It doesn't matter who you are...  
sooner or later you **will** speak in front  
of others!

Maybe today, maybe tomorrow or next week, or next year. Sooner or later you will be called upon to communicate, whether in your classroom, church, office, somewhere.

Does that thought scare you to death? It used to scare me. I had a stress headache for 3 days when I learned I had to take a public speaking class in order to graduate college. That was in 1985.

Over the last 18 years I have had numerous opportunities to speak in public, and thankfully I have accumulated some techniques that changed my life.

You can have the secrets that will  
ease your mind about public  
speaking and make you look like a  
pro!

***What would YOU do in the following situations?***

You are sitting in a group situation and suddenly you are asked to come to the front of the room and speak on a topic with NO PREPARATION. With **SECRET #1**, you will always be prepared to speak at a moment's notice, no matter the occasion, no matter what the topic!

You are about to give an oral report or speak before a group. Do you know the number one thing **you shouldn't say**? With **SECRET #2** you'll never make this rookie mistake.

You are in the middle of a presentation and the lights go out in the room, or a door slams, or one of a dozen distracting things happen. Do you keep your cool? You can if you know **SECRET #3**.

You've been asked to prepare a 10 minute talk. You've practiced and practiced and have the timing down just right. Moments before stepping up to speak, you are told that due to a shortage of time, you need to cut it down to 3 minutes. You now have moments to completely edit your speech! What will you do? If you knew **SECRET #4** you could completely cut or expand your talk in less than a minute, to whatever time you are given!

You'll also learn **SECRET #5** which alone can make you appear more professional in your speaking than most professional politicians. Once you learn this secret you'll notice how many bad public speakers there really are and you'll shine in comparison.

These secrets come from real life experience. You will not find them anywhere else and they are available to you **RIGHT NOW!**

---

You can download the eReport entitled  
**"Secrets of Fearless Public Speaking"**  
immediately when you order it from our SECURE online server.  
No waiting for an email, no waiting for the postal service, you get it
