FY 2006 Infrastructure Protection Program

Infrastructure Protection Program (IPP) Overview

Strengthening the Security of Critical Infrastructure

The Department of Homeland Security's (DHS) Infrastructure Protection Program (IPP) is an important component of the Administration's larger, coordinated effort to strengthen the security of America's critical infrastructure. This program implements the objectives addressed in a series of laws, strategy documents, plans and Homeland Security Presidential Directives (HSPDs). Of particular significance are the National Preparedness Goal (the Goal) and its associated work products, the National Infrastructure Protection Plan (NIPP), the National Strategy for Transportation Security (NSTS), and the National Strategy for Maritime Security (NSMS).

DHS is awarding nearly \$400 million through the fiscal year (FY) 2006 Infrastructure Protection Program, which incorporates seven programs that support major critical infrastructure sectors. Programs include: the Fiscal Year (FY) 2006 Port Security Grant Program (PSGP), the FY 2006 Transit Security Grant Program (TSGP), the FY 2006 Intercity Bus Security Grant Program (IBSGP), the FY 2006 Intercity Passenger Rail Security Grant Program (IPRSGP), the FY 2006 Trucking Security Program (TSP), the Buffer Zone Protection Program (BZPP), and the Chemical Sector Buffer Zone Protection Program (Chem-BZPP).

Purpose

The purpose of the FY 2006 IPP is to strengthen the nation's ability to prevent, protect against, respond to, and recover from terrorist attacks, major disasters, and other emergencies that could impact this country's critical infrastructure.

Port Security Grant Program (PSGP)

Background

The FY 2006 PSGP provides funds to enhance the security of the Nation's ports and port facilities. The FY 2006 PSGP emphasizes protection from improvised explosive devices, non-conventional methods of attack, and increased domain awareness in the port environment. The Nation's most critical seaports, as identified by the United States Coast Guard, plus one additional seaport eligible in FY 2005, were eligible to apply for funding under the FY 2006 PSGP.

Funding

The Department is awarding \$168,052,500 under the FY 2006 PSGP.

Transit Security Grant Program (TSGP)

Background

FY 2006 TSGP includes funds for rail transit systems, including commuter, light and heavy rail, as well as funding for intra-city bus and ferry systems.

Under the FY 2006 TSGP, awards decisions have been made according to a two-tiered approach. Regional rail and intra-city bus transit systems have been assigned to two-tier levels according to a DHS threat and risk analysis. Funding allocations were pre-determined for the highest risk, Tier 1 rail and intra-city bus transit systems, and those allocation amounts were announced in July 2006 and DHS has now obligated funds to those agencies. Regional rail and intra-city bus transit systems assigned to Tier 2 competed for available resources. Award decisions for those rail and intra-city bus transit systems assigned to Tier 2 were made following a review of applications by subject matter experts according to criteria outlined in the program guidance and application kit.

Funding

The Department is awarding a total of \$135,998,093 for the FY 2006 TSGP. Tier 1 allocations totaled approximately \$123 million. Tier 2 allocations totaled \$12,998,093 million.

Buffer Zone Protection Program (BZPP)

Background

The FY 2006 BZPP provides funds to States to support the implementation of Buffer Zone Plans (BZPs) outside the perimeter of identified critical infrastructure/key resource (CI/KR) sites. The list of eligible sites within each State will remain classified for security purposes. These plans are intended to develop effective preventive and protective measures that make it more difficult for terrorists to conduct surveillance or launch attacks within the immediate vicinity of high priority critical infrastructure targets. They also increase the preparedness capabilities of the local jurisdictions responsible for the security and safety of the surrounding communities.

Funding

The Department is awarding \$47,965,000 under BZPP.

The awards are being made to the designated State Administrative Agencies (SAAs) which will serve as the administrators of the BZPP funds. The SAAs must comply with the allocation and pass-through requirements to ensure the development and implementation of the Buffer Zone Plans by the responsible jurisdiction(s).

Chemical Buffer Zone Protection Program (Chem-BZPP)

Background

The FY 2006 Chem-BZPP provides funds to support the implementation of Regional Buffer Zone Plans in a region and outside the perimeters of identified chemical sector critical infrastructure/key resource (CI/KR) sites. These plans are intended to develop effective preventive and protective measures that make it more difficult for terrorists to conduct surveillance or launch attacks within the immediate vicinity of high priority chemical sector critical infrastructure targets and increase the preparedness capabilities of the jurisdiction(s) responsible for the security and safety of the surrounding communities.

Funding

The Department is awarding \$25,000,000 under Chem-BZPP.

The FY 2006 Chem-BZPP funds are awarded directly to the designated State Administrative Agencies (SAAs), which will serve as the administrators of the Chem-BZPP funds. The SAAs must comply with the allocation and pass-through requirements to ensure the development and implementation of the Buffer Zone Plans by the respective jurisdiction(s).

Intercity Bus Security Grant Program (IBSGP)

Background

The FY 2006 IBSGP emphasizes facility security enhancements in defined Urban Area Security Initiative (UASI) jurisdictions, facility enhancements, vehicle and driver protection, emergency communication technology, coordination with local police and emergency responders, and training and exercises. The FY 2006 IBSGP reflects the intent of Congress and the Administration to create a sustainable, risk-based effort for the protection of critical transportation infrastructure from terrorism, especially explosives and non-conventional threats that would cause major loss of life and severe disruption of service. FY 2006 IBSGP awards were made on a competitive basis. Applicants were the nation's intercity bus service providers.

Funding

The Department is awarding \$9,503,000 under the FY 2006 IBSGP.

Intercity Passenger Rail Security Grant Program (IPRSGP)

Background

The FY 2006 IPRSGP grant funds will be awarded to Amtrak to continue security enhancements for intercity passenger rail operations in the Northeast corridor (service between Washington, DC and Boston, Massachusetts), Amtrak's hub in Chicago, Illinois and also the West Coast Service Area in key, high-risk urban areas (Seattle, Portland, Sacramento, Oakland, San Jose, Los Angeles and San Diego). Technical assistance funding will enable DHS to facilitate and enhance these efforts.

Funding

The Department is awarding \$7,242,855 under the FY 2006 IPRSGP.

Trucking Security Program (TSP)

Background

The Department is awarding funding under the FY 2006 TSP to the American Trucking Associations (ATA). The FY 2006 program emphasizes awareness training, reporting of suspicious incidents, and information analysis.

Funding

The Department is awarding \$4,801,500 under the FY 2006 TSP to the ATA, located in Arlington, VA.

FY 2006 Infrastructure Protection Program

New Port Areas eligible in FY 2006 are in italics.

**Submitted application(s) but not receiving FY 2006 PSGP funding.

*** Los Angeles and Long Beach represent two separate port authorities, but are combined for PSGP purposes due to proximity and shared risk. Likewise, Norfolk and Newport News also represent separate port areas that are commonly referred to as the Port of Hampton Roads and are combined for the same reasons. Taking this into account, the total number of port areas receiving funding is 50.

Note: The FY 2002 - FY 2006 Award Total is representative of the cumulative funding awarded to the 101 port areas eligible to apply for funding in FY 2006; it does not include funding awarded to port areas in addition to the 101 that may have been eligible during previous fiscal years prior to FY 2006. Total funding awarded through the PSGP program since FY 2002 is \$876,399,146.

FY 2006 Infrastructure Protection Program

Port Security Grant Program Award Comparison by Port Area							
Port Area	FY 2002 Award Round 1	FY 2003 Award Round 2	FY 2003 (UASI) Award	FY 2004 Award Rounds 3 & 4	FY 2005 Award Round 5	FY 2006 Award Round 6	FY 2002 - FY 2006 Award Total
Victoria, TX	\$0	\$344,080	\$0	\$0	\$0	\$0	\$344,080
Wilmington, DE	\$500,000	\$0	\$0	\$0	\$0	\$0	\$500,000
Wilmington, NC	\$125,000	\$4,870,000	\$0	\$3,725,614	\$336,857	\$0	\$9,057,471
Total	\$78,957,273	\$147,093,664	\$68,791,664	\$184,699,156	\$141,969,968	\$168,052,500	\$789,564,225
Eligibility for previous fiscal years (FY 2002-2005) was vastly different than in FY 2006 making any comparisons difficult to support.							
Note: The FY 2002-2006 Award Total is representative of all funding awarded to the 101 port areas since the inception of the program; it does not include funding awarded to other port areas that may have been eligible during previous fiscal years. Total funding awarded through the PSGP program since FY 2002 is \$876,399,146.							
** Los Angeles and Long Beach represent two separate port areas, but are combined for PSGP purposes due to proximity and shared risk. Likewise, Norfolk and Newport News also represent two separate port areas that are commonly referred to as the Port of Hampton Roads, and are combined for the same reasons. Taking this into account, the total number of port areas receiving funding is 50.							

FY 2006 Infrastructure Protection Program

Summary of Risk Analysis Methodology FY 2006 Port Security Grant Program

The relative risk of each port area eligible under the FY 2006 Port Security Grant Program (PSGP) is analyzed using a 100 point scale, and made up of two components - Geographic Risk and Asset Risk - which are added together to produce a Total Port Risk.

I. Geographic Risk (Range: 0 – 50)

Geographic Risk represents the risk to a port area which cannot be directly attributed to specific critical assets. Geographic Risk is the product of Geographic Vulnerability, Geographic Consequence and Geographic Threat, with the first two factors having the dominant impact.

- Geographic Vulnerability represents the likelihood that a terrorist attack launched against a port will succeed, and including elements such as channel length, international visitors and number of Port Calls of various types.
- Geographic Consequence represents the adverse impact on the U.S. of a successful terrorist attack on a port facility including elements such as health and economic consequences and loss of service.
- Geographic Threat represents an assessment by the Intelligence Community about the intent and capability of known terrorist groups to target specific port areas.

II. Asset Risk (Range: 0 – 50)

Asset risk represents the terrorism risk to the individual critical assets within the scope of the port area. Asset Risk is the sum of two independent, but complementary, assessments of port asset risk, including port, private infrastructure, and vessel risks.
