

Costs to Certify Levee Systems by Hydraulic Area

Notes: Area A will be certifiable in 2010 upon completion of the work already authorized and funded, as well as the work proposed in the Supplemental now before Congress.

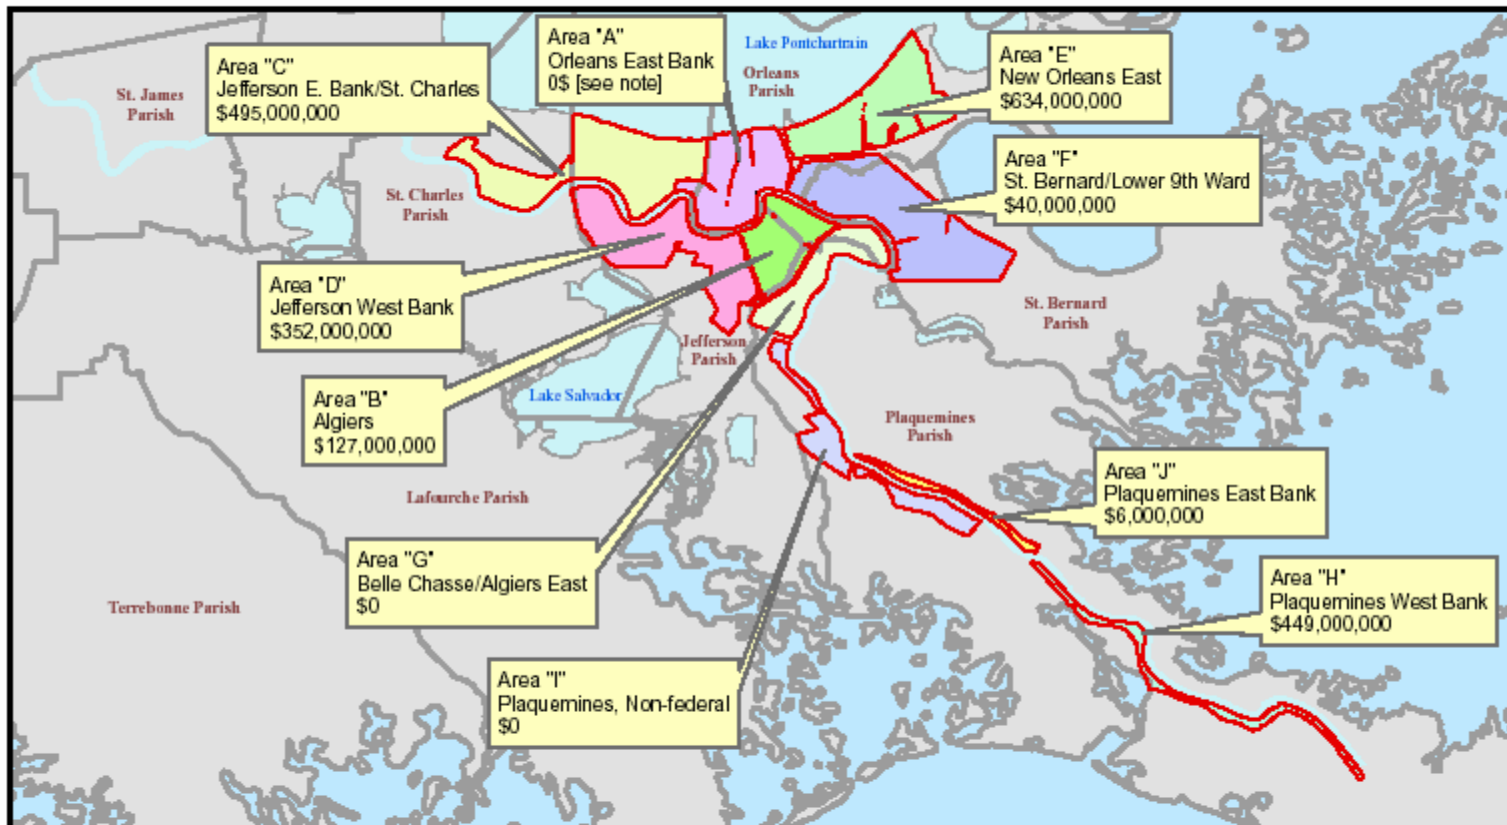

Estimated costs include land, easements and rights of way where necessary.

Hydraulically dependent areas are sections of the levee system that are inter-dependent due to shared levees and floodwalls. They represent the smallest unit of the levee system that can be considered separately for purposes of certification.
